As a wife of a longhaul truck driver, I know how important it is for them to have access to the most up to date information they can have on weather, road conditions and traffic delays. With XM they have the best information at hand day and night. Under no circumstances can I understand why anyone would want to limit this kind of information. I urge you to reject this petition and do so loudly. Drivers are subject to all kinds of pressures in the course of a day, and need to be able to count on one constant in their daily lives. XM radio give them good wholesome entertainment and keeps them up to date on what is going on around them. Please do not allow one group of people, namely the National Broadcasters Ass. to tell you or I or that lonely truck driver out there what we can or can not listen to. Reject this petition. Sincerely, Betty Penner
